ASX/Media Announcement

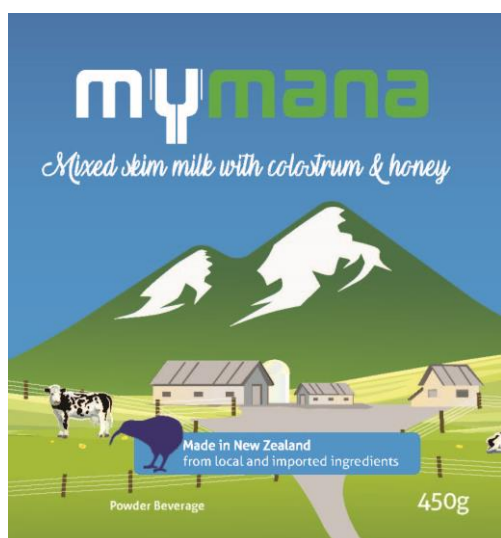

UNIQUE NEW ZEALAND COLOSTRUM AND HONEY BASED DAIRY FORMULA PRODUCT TARGETED FOR CHINA AND SOUTH EAST ASIA

Highlights

- **MYMANA a unique nutrition dairy formula for the entire family**
- **New Zealand colostrum, honey, and dairy milk formula targeted for China and South East Asia**
- **Registration approval received for Malaysia**
- **First shipment of 10,000 cans expected before 30 June 2018**

Bioxyne Limited (ASX Code: BXN) (Bioxyne or the Company) is pleased to advise that it has recently received registration approval for its MYMANA product for the high growth market of Malaysia. Application is in progress for a Chinese import license for MYMANA to be imported into China.

MYMANA is a unique formulation of New Zealand colostrum, honey, and dairy milk formula, boosted with vitamins and minerals for sustained energy. Colostrum and honey exerts positive effects on the immune system.

MYMANA provides added nutrition for daily consumption to support a healthy immune system, with sustained energy and wellbeing for the entire family.

MYMANA is manufactured in New Zealand.

Discussions are ongoing for MYMANA to be distributed in China, pending issuance of a Chinese import license.

Benefits of Colostrum

Colostrum is the first milk produced by all mammals after giving birth and is rich in antibodies to protect the newborn against disease. Colostrum has growth factors to assist healthy development and a range of biomolecules for general health and wellbeing.

There is substantial published scientific research on colostrum, focused in the areas of immunity, gut health, weight management and sports performance.

Benefits of New Zealand honey

Scientists are discovering that natural New Zealand honey has wide ranging health benefits. New Zealand honey, gathered from the pristine and clean environment of New Zealand contains antioxidants, vitamins, minerals, amino acids and enzymes that add to the immune system and general health and wellbeing.

New Zealand honey tastes good and is also a superior and healthier sweetener than other sweetening ingredients.
